

The Company gives details of the live shareholder webcast which will take place at 8.00 a.m. on Wednesday, 9th January 2019, providing an update on Company operations and activities.

The web cast shall be hosted by Simon Tucker, CEO of SRT, and is a public event and thus can be viewed live by anyone by following the below instructions. Questions can be submitted to the company via email prior to the event using info@srt-marine.com or live when viewing the webcast.

Anyone may view the webcast live on the day in complete privacy. In order to view the webcast live, please follow the below instructions shortly before 8:00am on Wednesday, 9th January (the day of the webcast).

To view the live webcast on the 9th January at 8:00am please follow the below instructions:

1. In your web browser go to www.srt-marine.com/news and scroll down the page to the "INVESTOR WEBCAST" section.
2. Click on the link "9th January 2019" and this will take you to a simple registration page, which once completed will give you immediate access to the live web cast. We recommend that this is done approximately 5 minutes prior to the start of the webcast.
3. During the web cast you may submit questions using the "ask a question" text box on your viewing page. These are immediately displayed to Simon to answer live. Please note that your question and any other personal details are not publicly displayed and or logged.

The identity of persons viewing the web cast and/or submitting questions will be kept confidential and will not be broadcast.

Shortly after the event an unedited recording of the webcast will be available in the news section of the SRT website.

About SRT Marine Systems plc:

SRT develops, manufactures and supplies maritime tracking technology and turn-key system solutions to marine stakeholders across the globe with a particular expertise in AIS. The Company's products and solutions are used by individual vessel owners, port authorities, maritime infrastructure owners, coast guards and national security agencies to enhance their maritime domain awareness. Applications include the tracking of commercial and leisure vessels; sustainable fishery; anti-collision; search and rescue; waterway management, port and coast security; pollution management; and environmental management.
