

# Fisheries Monitoring & Management System

THE NEW GENERATION OF NATIONAL FISHERIES MANAGEMENT

## The future of fisheries management

Our fully digitised national fisheries management system benefits all stakeholders, from the fisherfolk to the authorities to the national industry as a whole. Innovative functionality ensures significant direct benefits to fisherfolk, which enables positive engagement and adoption.

# About SRT Marine Systems

The global leader in national scale solutions for fisheries management.

For nearly thirty years, SRT has been at the forefront of fisheries management technology and systems, providing nation state and professional customers with robust and powerful products that deliver enhanced maritime monitoring and management capabilities.

SRT systems are chosen by national customers around the world to ensure sustainable fisheries growth and happy fisherfolk. Low cost, scalable, flexible and configurable, the SRT fisheries system delivers a new horizon of efficient and effective fisheries management capacity.

Our system resolves critical fishery issues

**SUSTAINABILITY**

**ENVIRONMENT**

**COMPLIANCE**

**SAFETY**

# Intelligent Fisheries

## A new horizon of fisheries management

**Next generation system** at a fraction of the cost of traditional technology, enabling deployment at scale and low cost per vessel.

**Continuous tracking** and monitoring of all fishing vessels – commercial and artisanal.

**Fully integrated management tools:** Vessel registration and licensing, quota management, catch reporting and audit, IUU detection and more.

**Flexible and scalable system** can flex and grow to cover all areas and all vessel types, with all data and systems under full and secure control of the operating authority.

**Happy fisherfolk** - SRT system includes functionality that actively helps and benefits fisherfolk.

**Sustainable fishing communities** through effective science based management of fishing stocks

**Enhance safety and save lives** with in-built safety features and SOS alerts.

**Integrated system** that connects multiple operators and stakeholders within a single, secure operating platform

# A system that benefits all stakeholders

Multiple benefits enables positive adoption and natural compliance

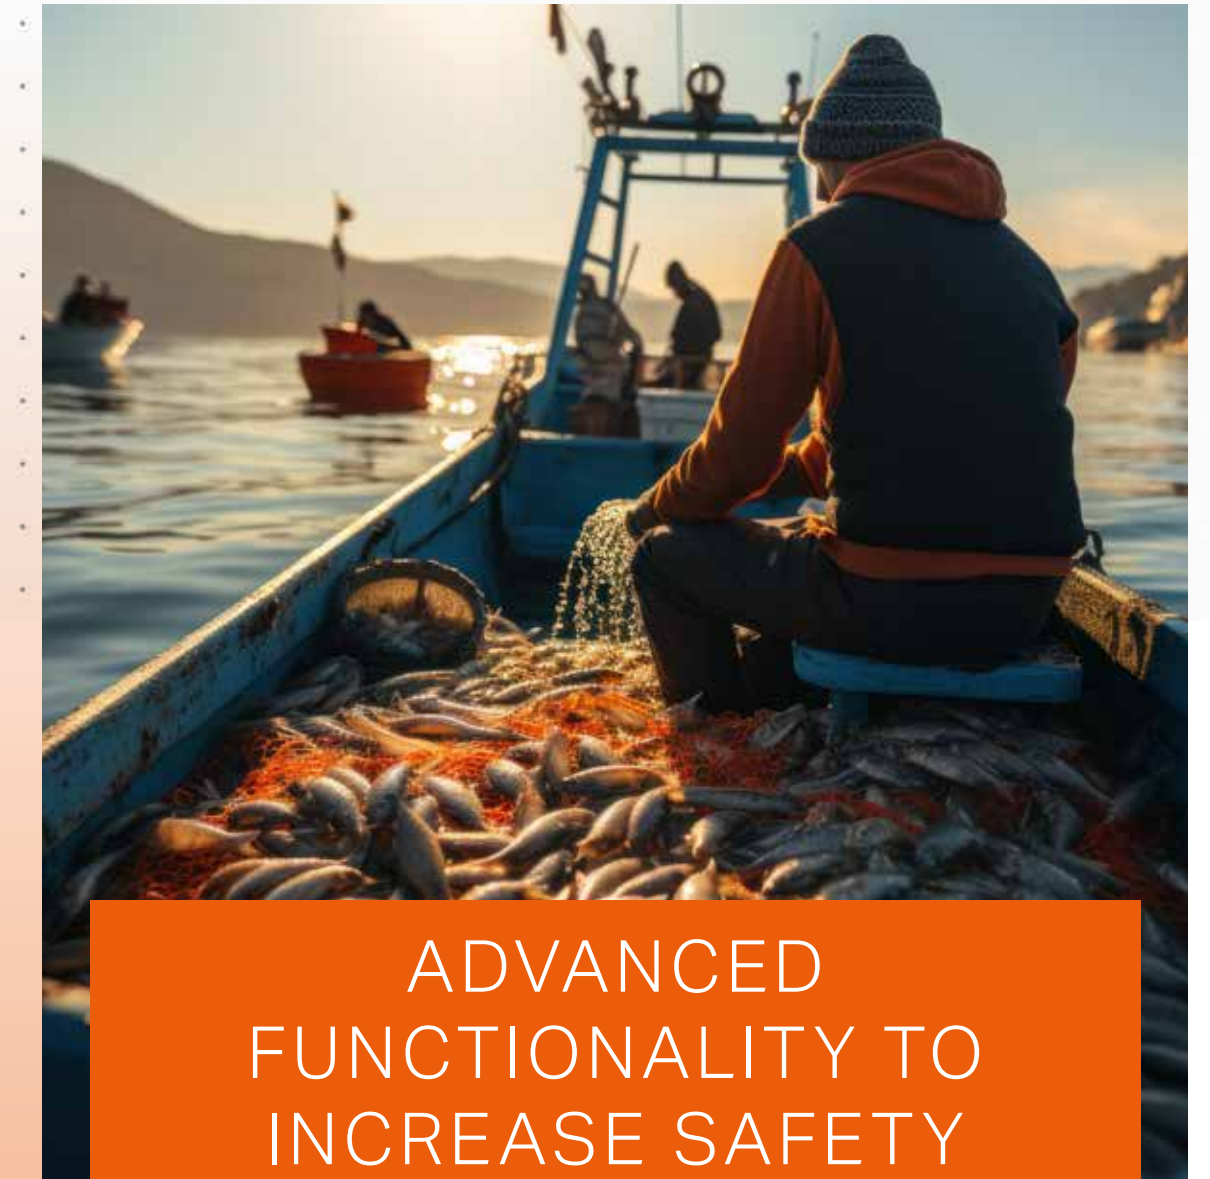

INCREASED CATCHES  
DUE TO HEALTHIER,  
**SUSTAINABLE FISH  
STOCKS**

INCREASED **EXPORTS**  
AND FISHERFOLK  
**INCOME**

SUPPORT YOUR  
COMMUNITIES WITH  
INCREASED  
**FOOD SECURITY**

ADVANCED  
FUNCTIONALITY TO  
INCREASE SAFETY  
AND **SAVE LIVES**

## ULTRA LOW COST

The world's lowest cost system, with combined implementation and operating costs typically 50% lower than other systems.

# Happy Fisherfolk

Functionality that specifically benefits fisherfolk, empowering them with information and delivering increased income, reduced risk, and long term sustainability.

The SRT fisheries management system has been designed to support fisherfolk through a range of features and benefits.

**AI-powered aquatic modelling analytics** direct fishermen to where the best and largest fish stocks are, improving catch productivity whilst protecting stressed stock areas.

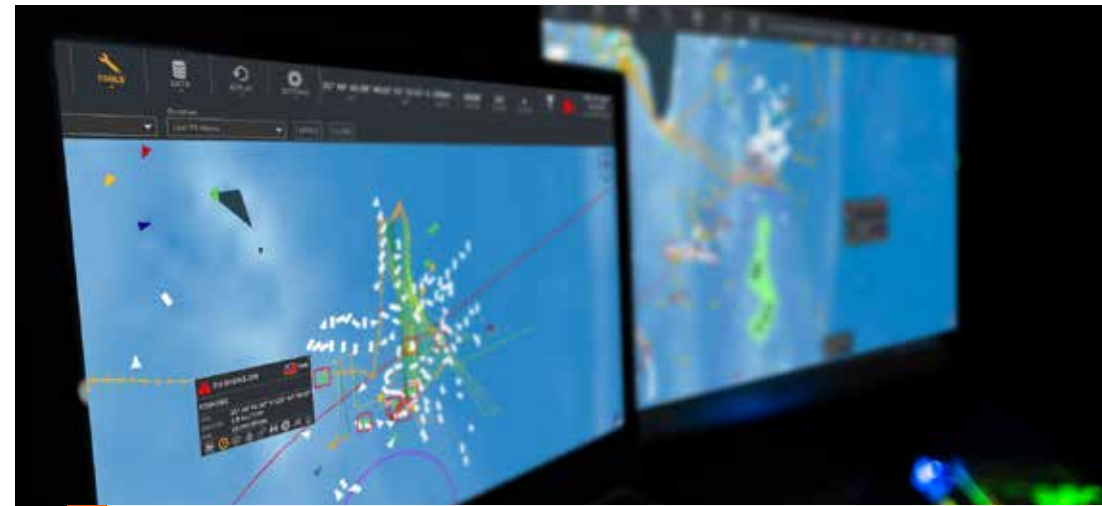

**Powerful and automated IUU** provides real and effective protection against illegal fishing and helps preserve stocks for local communities.

**Weather alert system** ensures that fisherfolk are alerted to unsafe weather events in real-time.

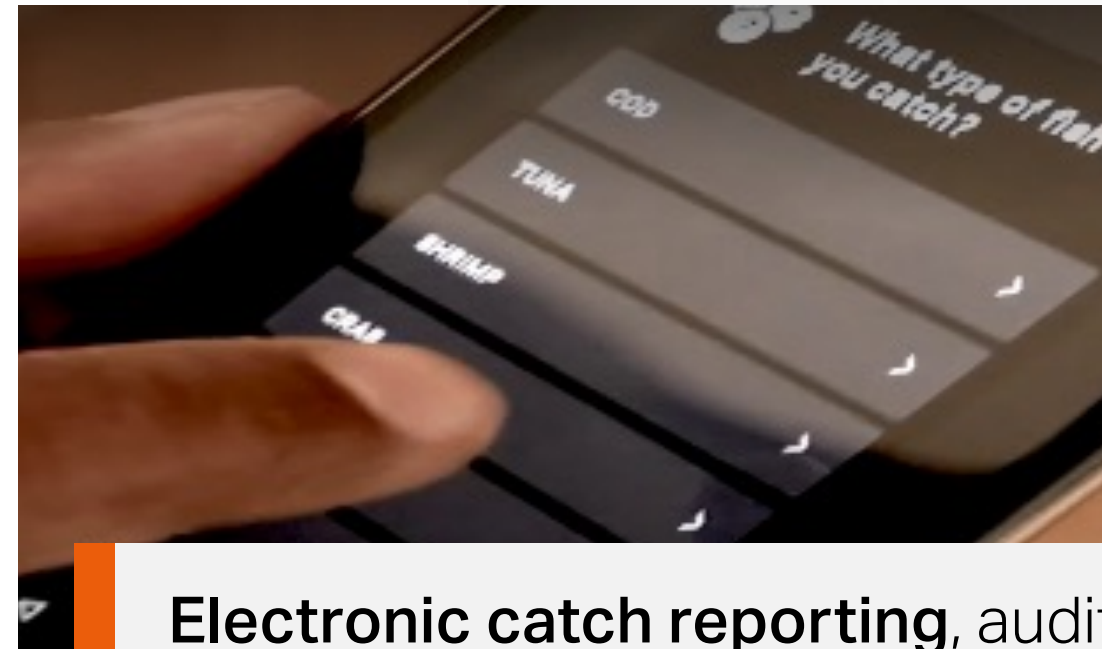

**SOS functionality** ensures that they can issue immediate alerts to authorities in the event of problems, ensuring they come home to their families.

# Complete fisheries monitoring and management in a single system

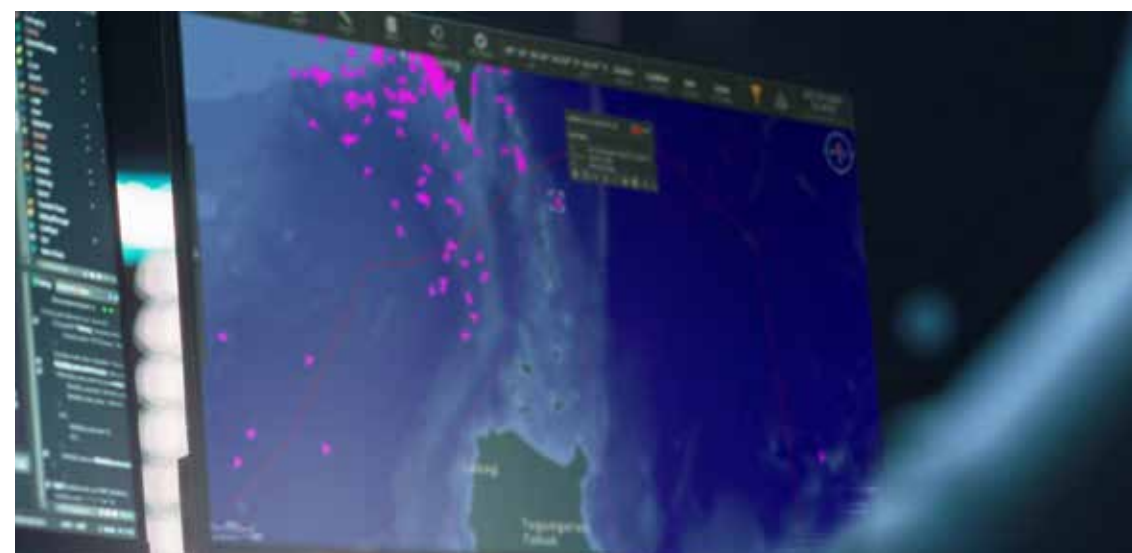

**Continuous hi-resolution real-time tracking** of all vessels of any size or type without range limitation.

**Electronic catch reporting**, auditing and supply chain integration.

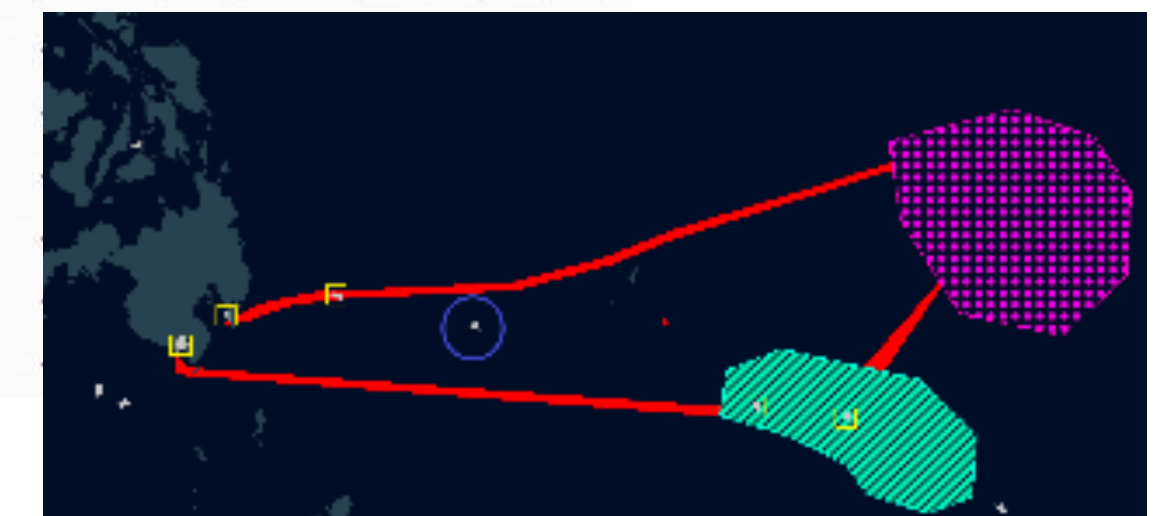

**Aquatic modelling** for optimal fisheries management and policy making.

Powerful AI that **automatically detects and alerts IUU fishing**.

**Vessel information system** for registration, license and quota management

**Fish finder for fisherfolk**, protects stressed fish stocks whilst optimising fisherfolk productivity.

# Turnkey Delivery

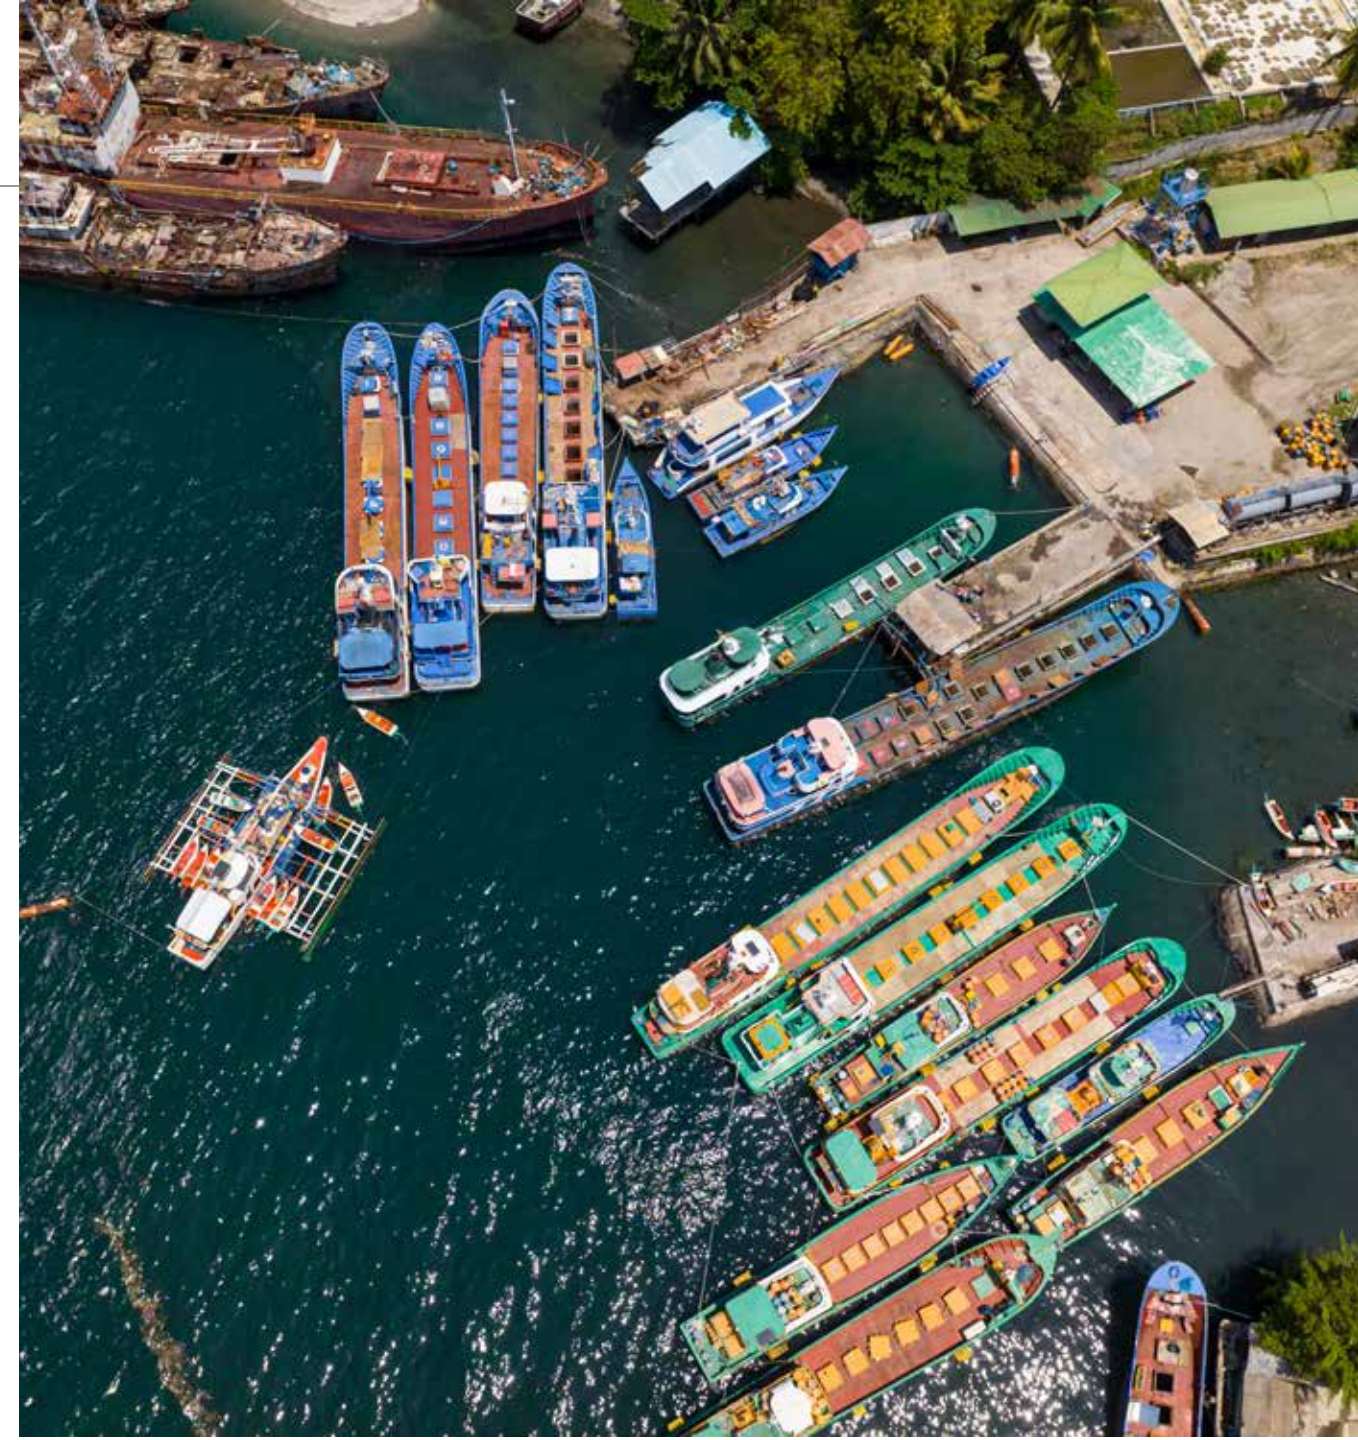

World-class technology and proven ability to deliver combine to ensure a seamless project experience from end-to-end.

**SYSTEM DESIGN AND SPECIFICATION:** We work in partnership with our customers to design and specify the system to their specific requirements, with the ability to customise any aspect to maximise long-term value.

**IMPLEMENTATION:** We manage every aspect of the system's implementation, including all civil works, from local infrastructure (towers, power systems, connectivity) through to specifying operator terminals.

**OPERATIONALISATION:** We ensure you teams have everything they need to maximise the utility of the system from day one, providing all training and ongoing support, capacity building and system warranties.

**PROJECT FINANCING:** SRT can provide a range of project financing options with advantageous terms to enable the long-term financing.

# Happy Fisheries. Happy Fisherfolk.

The SRT integrated fisheries management system enables nation states to actively monitor and manage fisheries in close co-operation and partnership with fisherfolk.

Innovative functionalities and ultra low costs multiply to deliver multiple benefits to the nation, the industry and individual fisherfolk.
